Copenhagen, February 2010

To our ocean freight customers

IMPORTANT INFORMATION – DESTINATION BRAZIL

With immediate effect, Brazilian Customs House authorities are precisely enforcing the correct entry of packaging types within the Siscomex Cargo system.

The generalization of different types of packaging is no longer tolerated.

Please find below an example how a B/L might have been issued until now and how it has to be issued from now on:

Presently reads:

10 packages (or colli) spare parts 1,210 kgs // 5.50 m³ => **no longer allowed**

Needs to read:

2 wooden pallets 560 kgs // 2,545 m³

2 plastic drums 220 kgs // 1,000 m³

1 wooden crate 200 kgs // 0,909 m³

5 cardboard boxes 230 kgs // 1,045 m³

It is mandatory to mention every single package type separately (including the material of which the packaging is made: plastic, wood, cardboard etc.) with the single weight and cubic metres for every package type.

Non-compliance with this regulation will result in correction letters which may be fined by Brazilian customs with BRL 5,000 (USD 2,900) per package in amendment!

Wirth kind regards
SCHENKER A/S
